ITP Tires

Ultra Cross Tire

About:

The low-profile design provides superior handling on smooth, hard surfaces — as well as eye-catching good looks! The tightly spaced, overlapping tread pattern lowers rolling resistance and enhances ride comfort. The tread pattern has also been computer-designed to reduce rolling noise levels. They are built with 6-ply radial construction and a new, more durable rubber compound that delivers longer wear and enhanced cut resistance. The super deep rim guard feature offers the best wheel lip protection in the business. Sizing available: 26x10R-15.

Our Thoughts:

With UTVs gaining popularity and new uses being discovered daily, it becomes more and more important to outfit your vehicle accordingly. If your primary use of your SXS is on hard surfaces, then this is the tire for you. It offers great traction and a smooth ride.

Pros:

Offers a smooth ride both on road and off road. It's a great street tire with an awesome tread pattern and aggressive looks.

Cons:

When you add the weight of the 15" wheel, the package seems to feel a little heavy.
